Professional Summary

Passionate frontend developer and MCA student with hands-on experience in React.js, Node.js, and full-stack development. Skilled in building responsive and scalable web applications, improving UI/UX, and automating business processes. Proven ability to collaborate with cross-functional teams and deliver user-centric digital solutions.

Education

· NMIMS, Mukesh Patel School of Technology Management and Engineering	2023 - 2025
Master of Computer Application	CGPA/Percentage: 3.40/4
· Ramnarain Ruia Autonomous College, Matunga	2023
Bachelor of Science in Computer Science	CGPA/Percentage: 8.73/10
· Maharshi Dayanand College, Parel	2020
Class XII	CGPA/Percentage: 70.46
· A.E.S High School, Mumbai	2018
Class X	CGPA/Percentage: 80.40

Technical Skills

- **Programming Languages:** Java, JavaScript
- **Frontend:** HTML5, CSS3, React.js, Bootstrap, Tailwind
- **Backend & Databases:** Node.js, Express.js, MongoDB, SQL
- **Other Tools & Platforms:** Git, GitHub, VS Code, Postman
- **Design & Media:** Adobe Photoshop, Canva, Video Editing, Figma
- **Documentation & Productivity:** MS Office (Word, PowerPoint), BRD, Flow Diagrams

Experience

Techap Solutions	September 2025- Present
· Junior Software Engineer (Level 1) Remote	
· Working on front-end development using React.js, HTML, CSS, and Bootstrap to build responsive and user-friendly interfaces.	
· Working on React Native applications , focusing on UI development, navigation flow, and integrating APIs for smooth mobile functionality.	
· Collaborating with the backend team to ensure seamless API integration and an optimized user experience.	
· Enhancing UI components while ensuring code reusability, scalability, and adherence to modern design standards .	
· Participating in project discussions, debugging, and implementing new features based on client requirements .	
· Contributing to continuous improvement initiatives with a focus on performance optimization and maintainability .	
E-Revbay Private Limited	December 2024- May 2025
· Tech Intern In-office	
· Contributed to UI/UX enhancement and process optimization initiatives , aligning solutions with broader business objectives.	
· Identified optimization opportunities in front-end components using HTML, CSS, and JavaScript, contributing to improved user engagement on FinqyInsure.	

- Participated in the end-to-end delivery of projects like Q Finance and Auto-Loans, supporting **test strategy creation, issue analysis, and resolution planning**, enhancing overall business functionality.
- Contributed to the **automation of credit evaluation processes** on the AECB project, supporting business objectives by streamlining PDF data extraction using Microsoft Azure AI solutions.
- Assisted in the creation of Business Requirement Documents (BRDs) and data flow diagrams, ensuring **clear communication of business needs and development clarity across teams**.

Projects

Prescripto – Online Doctor Appointments Portal Using React / Node.js / Mongo DB

2025

- Developed a full-stack healthcare web application enabling users to book doctor appointments and access digital prescriptions.
- Implemented user authentication, profile management, and dynamic doctor-patient scheduling workflows
- Focused on secure data handling, intuitive UI/UX, and RESTful APIs for seamless communication between frontend and backend.

Thrift Store using React / Node.js / Mongo DB

2024

- Designed and developed a second-hand clothing marketplace focused on **user-centric design and accessibility**.
- Implemented secure authentication, catalog search, and order workflows to mimic real-world ecommerce functionality.
- Emphasized **scalable architecture** and collaborative development using GitHub and Postman.

<https://github.com/yashkagawale/ThriftStore>

Face Recognition using Python

2022

- Developed a real-time face detection and recognition project using OpenCV and dlib, capturing webcam streams and marking attendance in Excel. Focused on optimizing algorithms for accuracy, performance, and a smooth user experience.

- <https://github.com/yashkagawale/Face-Recognition>

Intelligent Voice Assistant in Python

2022

- Developed a sophisticated voice assistant using Python and its libraries.
- Integrated speech recognition and natural language processing to enable intuitive voice commands and interactions.
- Features include executing commands, answering questions, performing tasks based on user input, searching on Google, playing songs on YouTube, taking notes on Notepad, and opening the camera.

Leadership & Activities

Student Council Coordinator (2022 - 2023)

Led student activities and improved cross-department collaboration.

Team Lead - Infrastructure Event Management (2022 - 2023)

Managed logistics and operations for college events.

Core Competencies

Technical Adaptability | Team Coordination | Strategic Mindset | Analytical Problem Solving | Documentation & Reporting
