

EDUCATION

· Mukesh Patel School of Technology Management and Engineering, Mumbai	2023 - present
Master of Computer Application	CGPA/Percentage: 3.32/4
· Ramnarain Ruia Autonomous College, Matunga	2023
Bachelor of Science in Computer Science	CGPA/Percentage: 8.73/10
· Maharshi Dayanand College, Parel	2020
Class XII	CGPA/Percentage: 70.46
· A.E.S High School, Mumbai	2018
Class X	CGPA/Percentage: 80.40

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, JavaScript
- **Web Development:** HTML5, CSS3, React.js, Bootstrap, Expo
- **Backend & Databases:** Node.js, Express.js, MongoDB, MySQL
- **Tools & Platforms:** Git, GitHub, VS Code, Postman, Android Studio
- **Design & Media:** Adobe Photoshop, Canva, Video Editing
- **Documentation & Productivity:** MS Office (Word, PowerPoint), BRD, Flow Diagrams

Experience

E-Revbay Private LimitedDecember 2024-present

- Tech Intern | In-office
 - Gained hands-on experience in **UI/UX** improvement, software testing, frontend development, and process automation across multiple projects.
 - Developed and optimized **front-end components** using HTML, CSS, JavaScript, and Bootstrap for projects like *FinqyInsure*, focusing on responsive layouts and user-friendly design.
 - Worked on Q Finance and Auto-loans, where I created test plans, documented bugs, and communicated **UI/UX** enhancement suggestions to the development team to improve functionality and usability.
 - Utilized **Microsoft Azure** in the *AECB automation project* to **train models using diverse PDF inputs**, contributing to the automation of credit evaluation processes.
 - Assisted in **Business Requirement Documents (BRDs)** and **data flow diagrams**, aiding efficient collaboration between teams and clarity in development planning

PROJECTS

Agricultural Commodities Analysis using Python2024

- Analyzed agricultural commodities across Indian states using Python for data preprocessing and created a Tableau dashboard for interactive visualizations.
- Key insights included trends in pricing, production quantities, certifications (GMO, Non-GMO, Organic), and export potential.
- The project identified top and bottom commodities by price, compared state-wise and district-wise price variations, and highlighted the impact of storage types—particularly cold storage—on export viability.

Thrift Store using React / Express JS / Mongo DB

2024

- Developed a MERN stack app for listing and purchasing clothing items, focusing on front-end UI with React. Implemented user authentication, item listing, search, and secure purchasing, with thorough API testing using Postman and code management via GitHub.
- <https://github.com/yashkagawale/ThriftStore>

News Application using React Native & Expo

2023

- Developed a React Native News App using Expo and News API, providing real-time updates and personalized feeds. Focused on efficient, cross-platform performance, dynamic content fetching, and seamless user experience, with code management via GitHub.
- <https://github.com/yashkagawale/Newz/tree/main/newz4>

Face Recognition using Python

2022

- Developed a real-time face detection and recognition project using OpenCV and dlib, capturing webcam streams and marking attendance in Excel. Focused on optimizing algorithms for accuracy, performance, and a smooth user experience.
- <https://github.com/yashkagawale/Face-Recognition>

Intelligent Voice Assistant in Python

2022

- Developed a sophisticated voice assistant using Python and its libraries.
- Integrated speech recognition and natural language processing to enable intuitive voice commands and interactions.
- Features include executing commands, answering questions, performing tasks based on user input, searching on Google, playing songs on YouTube, taking notes on Notepad, and opening the camera.

CERTIFICATIONS

- AWS: Data Scientist Course

February 2023

CO-CURRICULAR ACTIVITIES

Student Council Coordinator (2022 - 2023)

Team Lead - Infrastructure Event Management (2022 - 2023)
